FIG.66

FIG. 1 is a cross-sectional view of a first embodiment of a device. The device includes a housing (715) with a flange (712) and a base (713). A central shaft (713) passes through the housing. A piston (716) is positioned within the shaft, with a seal (714a) and a spring (714b) on its right side. A control rod (718) is connected to the piston via a linkage (718f). The control rod has a handle (718g) and a stop (718e). The housing has a flange (712) and a base (713). A dashed line indicates a cross-section III-III.
